Data Analytics Internship – Task 4

Sales Performance Analysis

Submitted to: Alfido Tech

Name: Swayam Rajesh Chavan
Domain: Data Analytics Internship
Tools Used: Python, Pandas, Matplotlib, Google Colab

Submission Date: March 2026

1. Introduction

This report presents a business-focused analysis for Alfido Tech by combining insights from customer behavior, sales performance, and website traffic data. The goal is to identify key areas of improvement and provide actionable recommendations to enhance customer engagement, sales growth, and overall digital performance.

2. Objective

- Improve customer engagement
- Increase sales and revenue
- Optimize website performance
- Enhance user experience

3. Key Observations

Customer Behavior

- Certain customer segments generate higher revenue
- Repeat customers contribute significantly to sales
- Some customers show low engagement

Sales Performance

- Some regions perform better than others
- Few products generate majority of revenue
- Some products are consistently underperforming

Website Traffic

- Traffic is concentrated from specific locations
- Certain pages attract more users
- Some pages have low engagement

4. Business Problems Identified

- Low engagement from some customer segments
- Underperforming products affecting revenue
- Uneven sales distribution across regions
- Drop-offs in user interaction on website

5. Recommendations

1. **Target High-Value Customers**

Focus marketing campaigns on high-spending and repeat customers.

2. **Improve Low-Performing Products**

Analyze and redesign or remove products with low sales.

3. **Regional Strategy Optimization**

Invest more in high-performing regions and improve strategies in low-performing areas.

4. **Website Optimization**

Improve design and content of low-engagement pages.

5. **Data-Driven Decision Making**

Use analytics dashboards for continuous monitoring and improvement.

6. Expected Outcomes

1. Increased customer retention

2. Increased customer retention

3. Better user engagement

4. Better user engagement
